

REQUEST FOR PROPOSAL: Digital Banking Platform

Issued By: FinCore Bank **Industry:** Banking and Financial Services **Date:** September 28, 2026

1. Project Overview

FinCore Bank seeks a technology partner to design and implement a secure digital banking platform for retail customers. The platform should unify account access, payments, customer support, alerts, and financial activity while integrating with existing banking systems.

2. Key Requirements

- Customer registration and secure authentication
- Account dashboard and transaction history
- Fund transfer and bill payment workflows
- Card management and transaction alerts
- Secure customer support messaging
- Fraud and suspicious-activity notifications
- Role-based access for customers, support staff, and administrators
- Customer profile and preference management
- Administrative dashboard and reporting
- Mobile-responsive web experience

3. Technical Requirements

- REST API integration with core banking systems
- Multi-factor authentication
- Encryption in transit and at rest
- Role-based access control
- Audit logging
- Scalable cloud architecture
- Automated backup and recovery
- API documentation
- Monitoring and incident logging
- Integration testing

4. Security, Accessibility and Delivery Considerations

- Financial data protection
- Fraud prevention controls
- Security testing
- Incident response procedures

- Accessibility testing
- Keyboard navigation and screen-reader compatibility

5. Implementation Timeline

Pilot within 16 weeks; full production launch within 32 weeks.

6. Budget

\$300,000 – \$450,000

7. Evaluation Criteria

- Relevant financial-services experience
- Security architecture
- Technical approach
- Integration strategy
- Implementation timeline
- Risk management
- Total value
- Pricing
- Post-launch support

8. Proposal Response

The proposal should include an executive summary, understanding of requirements, proposed solution, technical architecture, security and compliance approach, implementation plan, relevant experience, project team, pricing, risk management, support and maintenance, and a clear explanation of expected outcomes.
